

2014 Volcano Awareness Month Hawaiian Volcano Observatory

West Hawai'i's Kīholo Bay is flanked by two prominent, historic lava flows: the 1859 Mauna Loa flow (left) and a Hualālai flow erupted around 1800 (right). Photo courtesy of USDA Forest Service.

From Ka'ū to North Kona: Stories of lava flows and volcanic landscapes

Wednesday, January 22 ♦ 5:30 p.m.

NELHA Gateway Visitor Center

Directions: <http://www.energyfuturehawaii.org/driving-directions.html>

For more information, email askHVO@usgs.gov or call 808-967-8844.

While traveling from Ka'ū to North Kona, have you ever wondered about the prominent lava flows and volcanic landscapes along Queen Ka'ahumanu and Māmalahoa Highways? If so, this presentation is for you. Join USGS Hawaiian Volcano Observatory scientists **Jim Kauahikaua** and **Janet Babb** on a virtual road trip from Kahuku to Kapalaoa, during which they will talk about the volcanic history, stories, and impacts of the Mauna Loa and Hualālai lava flows you see along Highways 11 and 190.

NELHA Gateway Visitor Center (73-4460 Queen Kaahumanu Hwy #125, Kailua-Kona)
